Republicindia.in platform is Sharing Public Ideas to State Government.

**To**  
**Hon'ble Chief Minister**  
**Bihar Government**

**Message to**  
**Subject**  
**Creative Suggestion**

**Hon'ble Chief Minister**  
**Crisis of Migrant workers**

Sir,  
 I am from Bihar and living in Australia since last 10 Years. I am founder and CEO of a start-up company of IT consulting services (Cognitonic Systems) with offices in Australia and Hyderabad. Corona virus has created all sorts of problem for every one across the globe. But most impacted section is Migrant workers of our state Bihar. My idea is to use this tough situation to our advantage by registering and keeping a record all returning migrant worker by their skill sets. This will enable government with a holistic data set of all migrant workers and their skill sets. State government can have state to state contract for these skilled workers. This will not only prevent the exploitation of workers by other state companies but also provide information to state government about unorganized employment data as well Bihar's contribution to growth of other states and country. This data can also help to persuade companies to start their factories in Bihar as they can tap on cheap workers.  
 I also suggest ,during this lock down we should use these resources to do all the maintenance activities of offices,roads,bridges etc.

**What Positive change  
 This Suggestion can**

This will stop exploitation of migrant workers by other state companies .

**Bring ?** This will help to persuade the Companies to start their factories in Bihar .  
This is opportunity make this unorganized sector to organised and demonstrate the employment data of Bihar.

**How can be Implement ?** Capture all the Migrant worker data while bringing them back.Encourage them provide the information to be eligible for government support for reemployment.We as an Software organisation are happy to provide consulting to come-up with application which can record all the data.
